

## Socionext Embedded Software Austria to Showcase New Holistic HMI Approach at 11<sup>th</sup> Automotive World in Tokyo

**Linz, Austria and Yokohama, January 9, 2019** --- Socionext Embedded Software Austria (SESA) will be exhibiting at the 11th "Automotive World" at Tokyo Big Sight, January 16 to 18, 2019. At booth E45-36, SESA will highlight CGI Studio, a one-stop solution for creating brilliant HMIs like digital instrument clusters, head-up displays, infotainment systems and more.

### Holistic HMI solution "Holi"

SESA will highlight its new Holistic HMI approach. The solution, created with CGI Studio and based on Android/Linux, will show how multiple displays are perfectly interacting and communicating with each other. SESA's messaging and data binding tool "Courier Interaction Framework" enables smooth interaction between the HMI application and external data sources.

### Android Solution

The use of "nomadic" or portable devices (such as Apple CarPlay, or Google Android Auto) by a driver is increasing, and it is becoming more important that HMI tools can deal with these platforms and operating systems. At Automotive World, SESA will present an Android solution based on CGI Studio to prove that CGI Studio is ready for these "targets of the next generation".

### Presentation at the exhibitor's forum

SESA will make a presentation at the East-B sector talking about holistic HMIs on January 16, at 1:40 – 2:40 pm. The presentation will be made in Japanese.

Figure 1: Holistic HMIs enable to dynamically use content across multiple displays

Figure 2: SESA's Android solution includes touch interaction or rotation changes
