SC1220AT2 is a low power CMOS 60GHz radar sensor device and available for 3D motion sensing.

**Features**

**3Suit for 3D motion sensing**
- 2 Tx and 2 x 2 Rx antennas detect azimuth / elevation angle, velocity and distance
- Wide bandwidth (6.8GHz max.) and high-accuracy linear chirp FMCW radar
- Sensing area example: up to 0.5m*1 with < 1cm*2 resolution (in case of palm gesture)

**Highly integrated device enabling easy hardware design**
- Integrating antennas, radio, ADC, FIFO and SPI interface
- Enable to use reasonable PCB, less BOM and easy assembly
- Small package (7.0mm x 7.0mm, LGA package)

**Low power consumption**
- 4-Level operation states (Shutdown, Deep Sleep, Light Sleep, Sensing)
- Intelligent power control sequencer managing flexible duty cycle operation
- 2.5mW average power consumption at palm gesture sensing*3

*1: Depending on sensor configuration and environmental conditions
*2: To be changed according to further study
*3: In case of conditions that Socionext assumed

**Applications**

- Detection of people at the front door (use in a doorbell)
- Detection of people to switch the liquid crystal display of smart home appliances on and off
- Gesture operations
- Detection of people in rooms such as the living room (use in a smart thermostat)
The Products and product specifications described in this document are subject to change without notice for modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements. ### Deliverables of the Evaluation kit

- SC1220AT2 evaluation kit hardware with USB cable
- Sensor driver/library and 3D location sensing evaluation software (GUI)
- Related documents
  - Evaluation software (GUI) operation manual
  - API specification of control API
  - Application note (MATLAB and Sample C source for API)
