

Socionext Taiwan Inc. Established April 1

to develop cloud, IoT and 8K imaging applications
across the world from Taiwan

Taipei, Taiwan, April 6, 2016 --- Leading Japanese SoC (System-on-Chip) company Socionext Inc. was established in March 2015. Socionext Taiwan Inc. has been established in Taiwan on April 1, 2016. Socionext Inc. was established by consolidating the system LSI businesses of Fujitsu Limited and Panasonic Corporation to focus on the development and application of imaging, networking, computing and other state-of-the-art technologies. Currently, Socionext Inc. has seven business units (BUs), including Visual System, IoT & Graphics, Network SoC, High Performance SoC, Custom SoC, Milbeaut, and Connected Imaging, to engage in design, research and development, and sales activities. Five BUs are based in Japan, and one each in the United States and Europe.

According to Nobuhiko Aneha (姉齒伸彦), president of Socionext Taiwan Inc., Socionext Taiwan Inc. will develop more cloud and IoT applications with the company's core technology including computing, network, and imaging. By continuously developing advanced imaging technology, the company wishes to take the initiative in the 8K imaging market. As Taiwan plays a very important role in the IT industry, besides richly cultivating Taiwan to provide Taiwanese customers with faster response and more direct services, Socionext Taiwan Inc. will make Taiwan the forward base for the company to enter the Asia-Pacific, European, and US markets for huge business opportunities.

At the forthcoming Secutech International Exhibition and Conference (Apr. 19-21) on security held in Taipei and 2016 COMPUTEX Taipei (May 31 – June 4), Socionext Taiwan Inc. will exhibit the newest super-resolution imaging technology, high-speed video streaming, smart professional cameras, and security monitoring applications to provide customers with advanced experience and solutions with greater benefits in data transmission, professional equipment, entertainment, and security monitoring.
